Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/08/2006 has been entered.

Response to Arguments

Applicant's arguments with respect to claims 2, 4-10, 12-15, 17-23 and 25-27 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 2, 4-9, 15, 17-22 are rejected under 35 U.S.C. 102(b) as being unpatentable by Young (5727060).

Claim 2, Young discloses a method for navigating in a program guide (Col. 4, lines 47-Col. 5, lines 6), comprising:

Presenting the program guide to a user, the program guide comprising a time bar divided into a plurality of horizontally arranged time cells, a channel bar divided into a plurality of vertically arranged channel cells, and a program grid having a plurality of cell arranged in rows and columns, each of the cells being associated with one of the channel cells and at least one of the time cells (see Fig. 1-3, 5-6), wherein

At least one of the cells (26) in the program grid corresponds to a navigation cell selectable by the user (all the cells within the Grid are "navigation cell" because user could navigate through those cells by cursor 32, the navigation cell comprising at least one navigation point (see Fig. 5, "program linking icon" 46), and

A remainder of the cells in the program grid corresponds to a program information cell (reads on all the cells with title/text description of corresponding TV program);

Receiving a user selection of the navigation cell (reads on the user using a remote control to navigate through the cells and t to select one of the cell for displaying TV programming content; Col. 6, lines 61-Col. 7, lines 40); and

Navigating the program guide to the at least one navigation point in response to the user selection of the navigation cell (Col. 8, lines 11-36).

Claim 4, Young further discloses reposition a cursor from a program information cell within the program grid to the navigation cell (inherently reads on the navigation features using a remote control, Col. 6, lines 61-Col. 7, lines 40).

Claim 5, Young further discloses scrolling the program information cells while keeping the navigation cell substantially fixed in response to user input (reads on Fig. 1-3, 5-6 in which the user scrolls up/down the cursor along the program title/cell el. 26 within the program display el. 10 in which the cells 26 stay fixed within the Grid).

Claim 6, Young further discloses presenting an icon in the navigation cell (the navigation cell 26 is an icon because of its 3D presentation when the cell is highlighted by the cursor 32, Col. 7, lines 20-27, see Fig. 1-3, 5-6).

Claim 7, Young further discloses wherein the at least one navigation point corresponds to programs that are currently being broadcast (see Fig. 5 with el. 46 associated with programs that are currently broadcasting and correspond to navigation point of "Lucy" show, as described in Col. 8, lines 2-37).

Claim 8, Young further discloses wherein the at least one navigation point corresponds to programs that are broadcast on a premium channels selection (Pay Per View) displays list of PPV programming (Col. 27, lines 1-5).

Claim 9, Young further discloses wherein the at least one navigation point corresponds to programs that are broadcast during a primetime time period (Col. 24, lines 38-42).
